Dataset metadata

This dataset classifies the usual resident population of England and Wales as at census day, 27 March 2011, by ethnic group, by sex and by age.

Statistical Disclosure Control

In order to protect against disclosure of personal information from the 2011 Census, there has been swapping of records in the Census database between different geographic areas, and so some counts will be affected. In the main, the greatest effects will be at the lowest geographies, since the record swapping is targeted towards those households with unusual characteristics in small areas.

More details on the ONS Census disclosure control strategy may be found on the [Statistical Disclosure Control](#) page on the ONS web site.

Variables

geography

There is no further information about geography.

Sex

Sex is the classification of a person as either male or female.

Age

Age is derived from the date of birth question and is a person's age at their last birthday, at 27 March 2011. Dates of birth that imply an age over 115 are treated as invalid and the person's age is imputed. Infants less than one year old are classified as 0 years of age.

Ethnic Group

Ethnic group classifies people according to their own perceived ethnic group and cultural background.
